

POLYURETHANE SCREEN DECK

TYPE MP

cribansa

- ◆ Tensioned PU screen with steel reinforcement.
- ◆ Supplied with fixing tension system on sides or with a self-supporting steel frame inside.
- ◆ Recommended for fine and medium sizes of screening.

TYPE MT

cribansa

- ◆ Tensioned PU screen with cord reinforcement inside.
- ◆ Supplied with fixing system on sides.
- ◆ Used for fine and medium sizes of screening.
- ◆ Punched apertures gives to this type more screening surface and the others advantages of polyurethane production.

Cribas de poliuretano

TYPE FX

cribansa

- ◆ Tensioned PU screen used in machines with longitudinal support bars which show some obstruction problems.
- ◆ Supplied with light tension hooks.
- ◆ Recommended primarily for small sizes screening.
- ◆ Produced with polyurethane more flexible which make easy the screening process
- ◆ Punched holes provides to the screen more screening surface and the rest of advantages of polyurethane products.

TYPE HR

- ◆ Tensioned flexible PU screen with steel cables for a high efficiency of screening.
- ◆ Supplied with lateral tension system.
- ◆ Used for fine and intermediate screening sizes.
- ◆ A high screening surface similar to wire mesh.
- ◆ Prevents and reduces obstructions with screening of wet and sticky materials.

(See apertures and thickness available)

POLYURETHANE MODULAR

TYPE PM

- ◆ Self-supporting PU panels with steel reinforcement.
- ◆ Modular system applicable to any type of vibration screen.
- ◆ The small size of the panel make easy and quick the replacement of used panels.
- ◆ Flexible screening surface reduces clogging problems.
- ◆ Used primarily for screening fine to medium sizes.
- ◆ Manufactured in different types of fixing system used by manufacturers of the screen machines. Wide possibilities of molded holes depending of applications.

CRIBANSA Modular System

(Detail of fixing)

FLEXIBLE PANEL (PT)

- ◆ Flexible polyurethane panels.
- ◆ Used for flip-flow screen types in recycling plants of glass and waste in general.
- ◆ Produced with different hardness, thickness and apertures according to any case.
